SGL, S.L successfully implements SAP.

.SGL has now integrated SAP, the leading tool for resource planning.

SGL, General Laboratory Supplies, S.L has successfully implemented the business solution for managing SME: SAP.

This tool will help us to generate new contacts and manage our current clients more effectively. We wish to share this news with you because we believe it is a real benefit for all our loyal clients who have trusted in us and continue trusting in our brand.

Our decision has been taken so that we can optimise, control and offer quicker solutions for our clients:

Because, it will help us to integrate and consolidate information

(We want to build up our relationship with the client)

Because, it simplifies each operation

(We reduce timings , speeding up the process)

Because, it organises and updates processes

(Transactions are guaranteed, based on local and international regulations)

Because, it increases control and flexibility within processes

(We treat every client as an individual)

Finally, following company values, **SGL**, has always sought to provide the best quality products on the market, as well as ensuring our commitment to client satisfaction. Just as we announce the implementation of a business management tool we think this is a step towards establishing stronger relationships. A major advantage is that we can now offer higher performance and better pricing for our customers, optimising processes and increasing know-how. SGL has a priority towards modernising, adapting our managing tools to the future, innovating and developing opportunities.
